Signal School
The school app of Signal Shala

Testing guide
for the QA team

What Signal Shala is, what the app does, and how to test it step by step on a phone and a computer.

In this folder: this guide · **Signal-School-Test-Cases.xlsx** (the list of tests) · **test-files** (photos and sheets to upload).

1 What is Signal Shala?

A school for children who live and work at traffic signals.

In big cities many children spend the whole day at traffic signals with their families – selling flowers, toys or books between the cars. Most of them have never been to school. **Signal Shala** ("signal school") started in 2016 right under the Teen Hath Naka flyover in Thane, Maharashtra, in classrooms made from shipping containers. It is run by the trust **Samarth Bharat Vyaspeeth** together with the Thane Municipal Corporation.

The school gives these children lessons, a meal, health check-ups and a safe place, and helps them move on to regular schools.

Why this matters for testing

- The **teachers** use cheap Android phones, often with weak internet. The app must be **simple, big and quick**.
- Many children **join and leave during the year** (families move). Admitting, leaving and re-admitting must be easy.
- Attendance is taken **every morning**. It is the most important screen – it must never lose data.
- Users speak **Marathi, Hindi, Gujarati or English**.

2 What does the app do?

Every day

- **Attendance** in a few taps (works without internet too)
- **Children's records**: photo, parents, phone, health
- **Diary**: notes about a child or the whole class
- **Syllabus**: tick topics as they are taught
- **Dashboard** for the principal: who is absent, who needs a call

Now and then

- **Marks** and printable **report cards**
- **Import** many children from Excel
- **Leaving certificate** when a child leaves
- **New academic year**: move children up a class
- **Looks**: 6 colour styles for the whole school

Languages: English · हिंदी · मराठी · ગુજરાતી

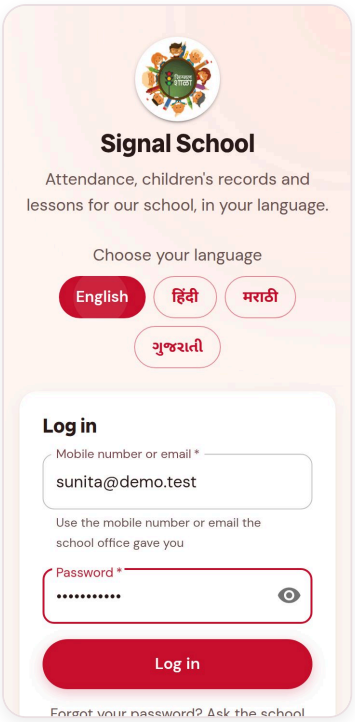

3 Who uses the app

Role	First screen	What they do
Teacher	Today	Takes attendance of their class, writes the diary, ticks syllabus topics, enters marks, looks at children's records. Only on a phone.
Office clerk	Dashboard	Admits new children, imports from Excel, records health check-ups, marks children as left, prints leaving certificates. Can see attendance but not take it.
Principal (admin)	Dashboard	Everything in the school: teachers and staff, classes and subjects, holidays, academic years, school settings and look, activity log.
Trust owner	Dashboard	Like the principal, but for all schools of the trust (Thane and Nerul), and can add schools.

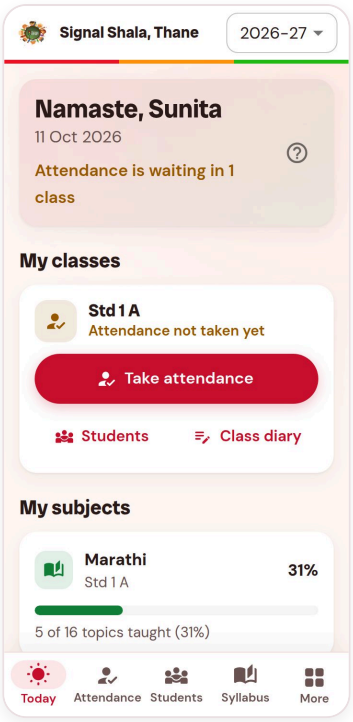

4 Words you will see

Word	Meaning
Std 1 A	A class: "Standard 1", division A. **Balwadi** is the class before Std 1 (pre-school).
GR / Register number	The child's school register number, e.g. `SS-168`. Given automatically.
Roll no.	The child's number inside the class list (in name order).
P · A · L · LT	Present · Absent · Leave · Late (attendance marks).
Academic year	School year, e.g. `2026-27` (June to April). Old years can be seen but not changed ("Closed"). A new year can be prepared early ("Planned").
Look	The colours, letters and icons of the app. The principal chooses one for the whole school.
Re-admit	A child who left comes back: the old record is reused, nothing is lost.
Activity log	A list of who changed what and when (for the principal).

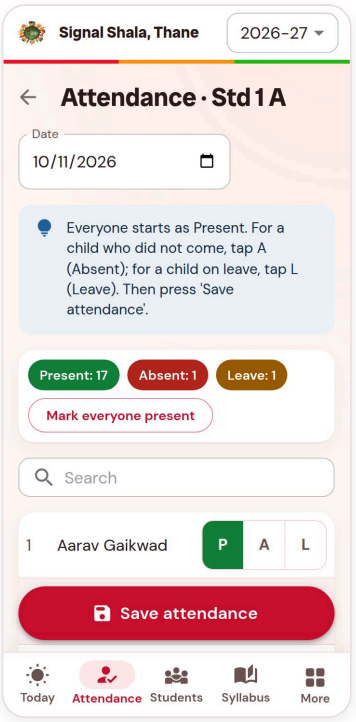

5 A quick tour

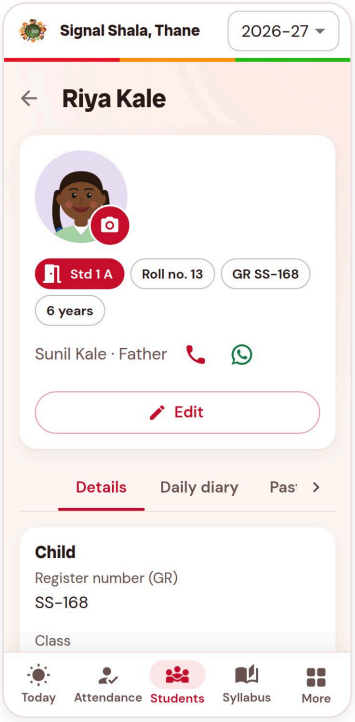

Login – choose the language, then mobile number or email and password.

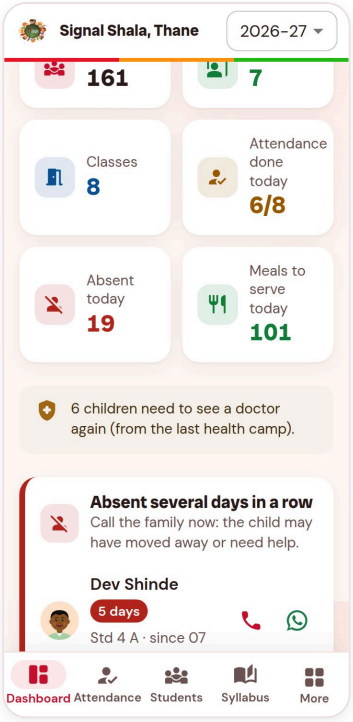

Today (teacher) – the class, a big "Take attendance" button and syllabus progress.

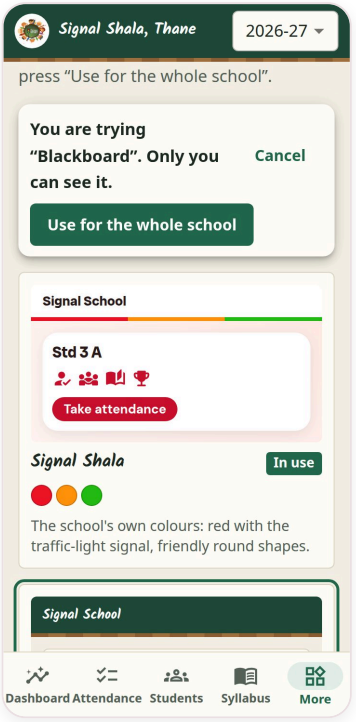

Take attendance – everyone starts Present; tap A or L, then "Save attendance".

Child's profile – photo, class, parent with call and WhatsApp, tabs for diary, past years, report card, health.

Dashboard (principal) – today's numbers and children absent many days in a row.

Look – the principal tries a look (here "Blackboard") before using it for everyone.

On a phone the menu is the bar at the bottom: **Today/Dashboard, Attendance, Students, Syllabus, More**. On a computer it is on the left side.

6 How to test

Before you start

- An **Android phone** with Chrome, and a **computer** with Chrome. (A second phone helps for the "Looks" tests.)
- The **app link** you received. Open it in Chrome.
- Copy the folder **test-files** to the phone (e.g. through Google Drive or a USB cable) so you can upload photos and sheets from the phone.
- Open **Signal-School-Test-Cases.xlsx** (Excel or Google Sheets). Read the sheet "Start here".

For every test case

1. Read the row: **Who logs in**, **Device**, **Where**. Log in as that person (passwords are on the sheet "Logins").
2. Do the **Steps** exactly, with the **Test data** given.
3. Compare with the **Expected result**. Look at the whole screen, not only the one thing.
4. Choose a **Status**: Pass Fail Blocked Skipped (it starts as Not run). Write the date and your name.
5. Anything strange? Write it in **Comments**, even if the test passed. For a Fail, also fill a row in the sheet **"Bugs"**.

On every screen, also check

- All text can be read; nothing is cut off or overlapping
- No sideways scrolling on a phone
- Buttons are easy to tap with a thumb
- The bottom bar never hides a button
- Messages are clear and in the chosen language
- Nothing keeps "loading" for more than a few seconds
- After saving, the change is still there when you reopen
- Photos and names match the right child

Test in this order

Day	Sheet "Test cases", rows starting with…
Day 1	**LG** (Login) and **TC** (Teacher) – on a phone
Day 2	**CL** (Office clerk) and **PR** (Principal) – computer and phone
Day 3	**OW** (Trust owner), **LK** (Looks) and **GN** (General) – then re-check every Fail

7 Writing a good bug

A developer must be able to see the same problem. Write short, simple sentences and add a screenshot.

Column (sheet "Bugs")	Example
Test case ID	TC-06
Screen	Take attendance · Std 1 A
What happened	After "Save attendance" the Today page still says "Attendance not taken yet".
What should happen	Today shows "Attendance done: 18 of 19 present".
Steps to see it again	1. Log in as sunita@demo.test 2. Take attendance 3. Mark Aryan Mhatre A 4. Save 5. Go back to Today
Phone / Computer	Redmi 9A, Android 11, Chrome 129
Screenshot file	bug-01.png (put all screenshots in one folder)
How bad	**Blocker** (cannot continue) · **Major** (wrong result) · **Minor** (works, but confusing) · **Cosmetic** (looks wrong only)

Screenshot on Android: press **Power + Volume down** together. Also write the **time** when it happened.

Please do NOT

- Make the new year **2027-28 "current"** (test PR-20). Keep it "Planned", or all classes change for everyone.
- Add a holiday for **today**, or change the school's **weekly holidays** – attendance tests would stop working.
- Use real children's names, photos or phone numbers.
- Forget to set the look back to **"Signal Shala"** at the end (test LK-12).

Something is stuck?

- **Page looks old or empty** – pull down to reload, or close and open the tab.
- **"Too many wrong attempts"** – that login waits 15 minutes. Use another login meanwhile.
- **"Too many attempts. Please wait a moment."** – too many logins from your network in a short time. Wait a few minutes; tell the developer if it keeps happening.
- **The test data is mixed up** (e.g. a child is already "left") – ask for a **test data reset**. It brings back everything as described in this guide (your changes are removed).
- **A test depends on an earlier one** that failed – mark it Blocked and say which one in Comments.

8 Logins and test data

Two made-up schools: **Signal Shala, Thane** (Balwadi to Std 7, red "Signal Shala" look) and **Signal Shala, Nerul** (Balwadi to Std 2, "Marigold" look). Every day counts as a school day in the test data.

Role	Name	Login	Password	Notes
Teacher	Sunita Patil	sunita@demo.test 9820000004	password123	Class teacher Std 1 A (not taken today)
Teacher	Rahul Verma	rahul@demo.test	password123	Std 5 A; Maths, English Std 5–7
Teacher	Kavita Jadhav	kavita@demo.test	password123	Std 2 A and Std 3 A (Std 3 A not taken today)
New teacher	Neha Joshi	newteacher@demo.test	Welcome@123	First login: must choose a password
Inactive	Deepak Rane	inactive@demo.test	password123	Must not be able to log in
Office clerk	Ganesh Pawar	clerk@demo.test	password123	
Principal	Anita Deshmukh	principal@demo.test	password123	Signal Shala, Thane
Trust owner	Meera Kulkarni	owner@demo.test	password123	Both schools
Teacher (Nerul)	Imran Shaikh	imran@demo.test	password123	Second school

Children prepared for tests (Thane)

Child	Class	Prepared as
Riya Kale	Std 1 A	Photo; parent Sunil Kale 9123400001; was in Balwadi last year
Aryan Mhatre	Std 1 A	No photo yet
Ishaan Jagtap	Std 2 A	Birthday today
Swati Gholap	Std 2 A	Needs a doctor again (eyes)
Nikhil Sonawane	Std 3 A	To be marked as left (clerk test)
Kiran Thakur	Std 4 A	Absent the last 5 days, low attendance; parent 9123400004
Lata Bhalerao	left last year	Found with "Search all years"; to be re-admitted

Thank you!

Your testing helps teachers at Signal Shala spend less time on registers and more time with the children. If something is unclear in this guide or a test case, write it in Comments – unclear things are worth fixing too.

9 Files to upload

All in the folder **test-files**.

File	Use
child-photo-girl.jpg, child-photo-boy.jpg, teacher-photo.jpg	Photos to upload
school-logo.png	School logo
photo-too-big-9MB.png · not-a-photo.pdf	Must be refused (too large · wrong type)
students-import-5-good.xlsx · students-import-3-rows.csv	Import: all rows ready
students-import-with-errors.xlsx	Import: 1 ready, 4 with problems (picture below)

Example: import with mistakes

This is what you should see after choosing **students-import-with-errors.xlsx** (test CL-08). Only the green “Ready” row is imported.
